System **KAN-therm** ultraPRESS

is compatible with and fully replaces the existing system **KAN-therm Press**, both in terms of fittings and pipes.

System **KAN-therm ultraPRESS components have the same catalogue codes and prices as its predecessor.**

“The difference you can see at first glance is the new colour of fittings made of light-coloured PPSU,”
– says Mariusz Choroszuca – Director of the KAN Group Technical Support Department.

The range of brass fittings is supplemented by diameter 32×3 mm.

New pipe markings serves for proper identification.

To make the installation process as easy as it could be, we have also made personalised KAN tools available to our clients, consisting of three sets of tools with U and TH jaws, equipped with an automatic jaw retraction function.

The manufacturing process of the System **KAN-therm** ultraPRESS ensures that the generation of non-recyclable waste is reduced by 50%.
